## DETAILED ACTION

### *Drawings*

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the surfaces 31, 32 must be shown as concave surfaces with one more concave than the other or the feature(s) canceled from the claims 2-4. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Komatsu (4810203).

Komatsu (Figures 1-13) shows an electrical card connector having a base 10 with a plurality of slots of different widths and heights sharing a common space and insert ports 11 formed at a front face of the base, a plural rows of terminals 30 with an elastic contact portion and a connection portion positioned in the base wherein one of the slots formed by tray 12 is tilted inwardly and downwardly from the inlet port.

***Allowable Subject Matter***

4. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. The following is a statement of reasons for the indication of allowable subject matter:

Prior art does not show a portion of the base with a first concave surface and a second concave surface wherein the first concave surface is more concave than the other.

Art Unit: 2839

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Niimura (5613866), Bricaud et al. (6120328), Koser (2004/0106317), Hills (5066241), Ito et al. (6210193) and Johnson et al. (6361350).
